Yes. I spoke with Pat Goddard (Estabrook) and Matt Fragala (EH&E) on Thursday. They told me results are expected the end of this week.

Dear Ms. Tisa,

I am writing to follow up on our phone conversations about air quality testing at Estabrook School in Lexington, MA. Do you know if the air testing got done last week--in October as scheduled and as recommended by the environmental consultants (EH&E)--especially in Rooms #4 and #6?

I am hoping the Town stuck to it's agreement to test as promised given the "above threshold" results over the last several tests.

I look forward to seeing the results and getting your opinion of them.

Regards,

Ben Esty
